

# Doubled-Up Homelessness by Metropolitan Area

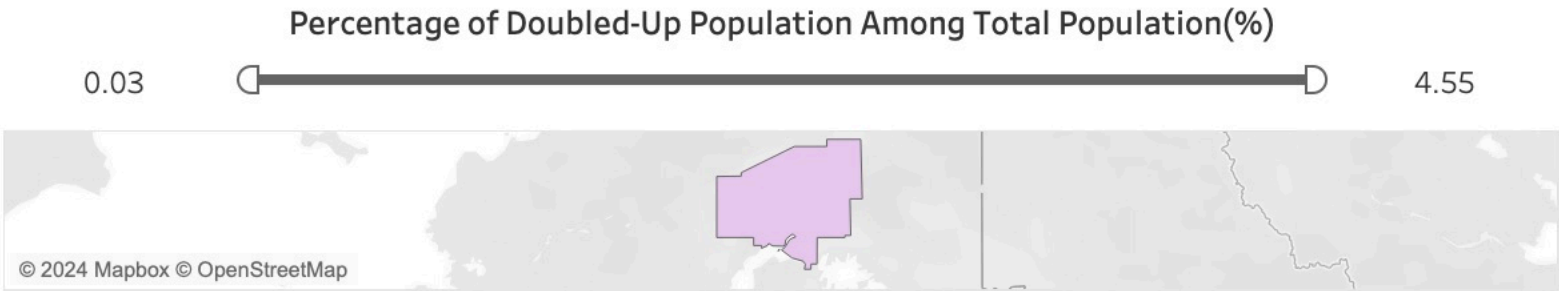

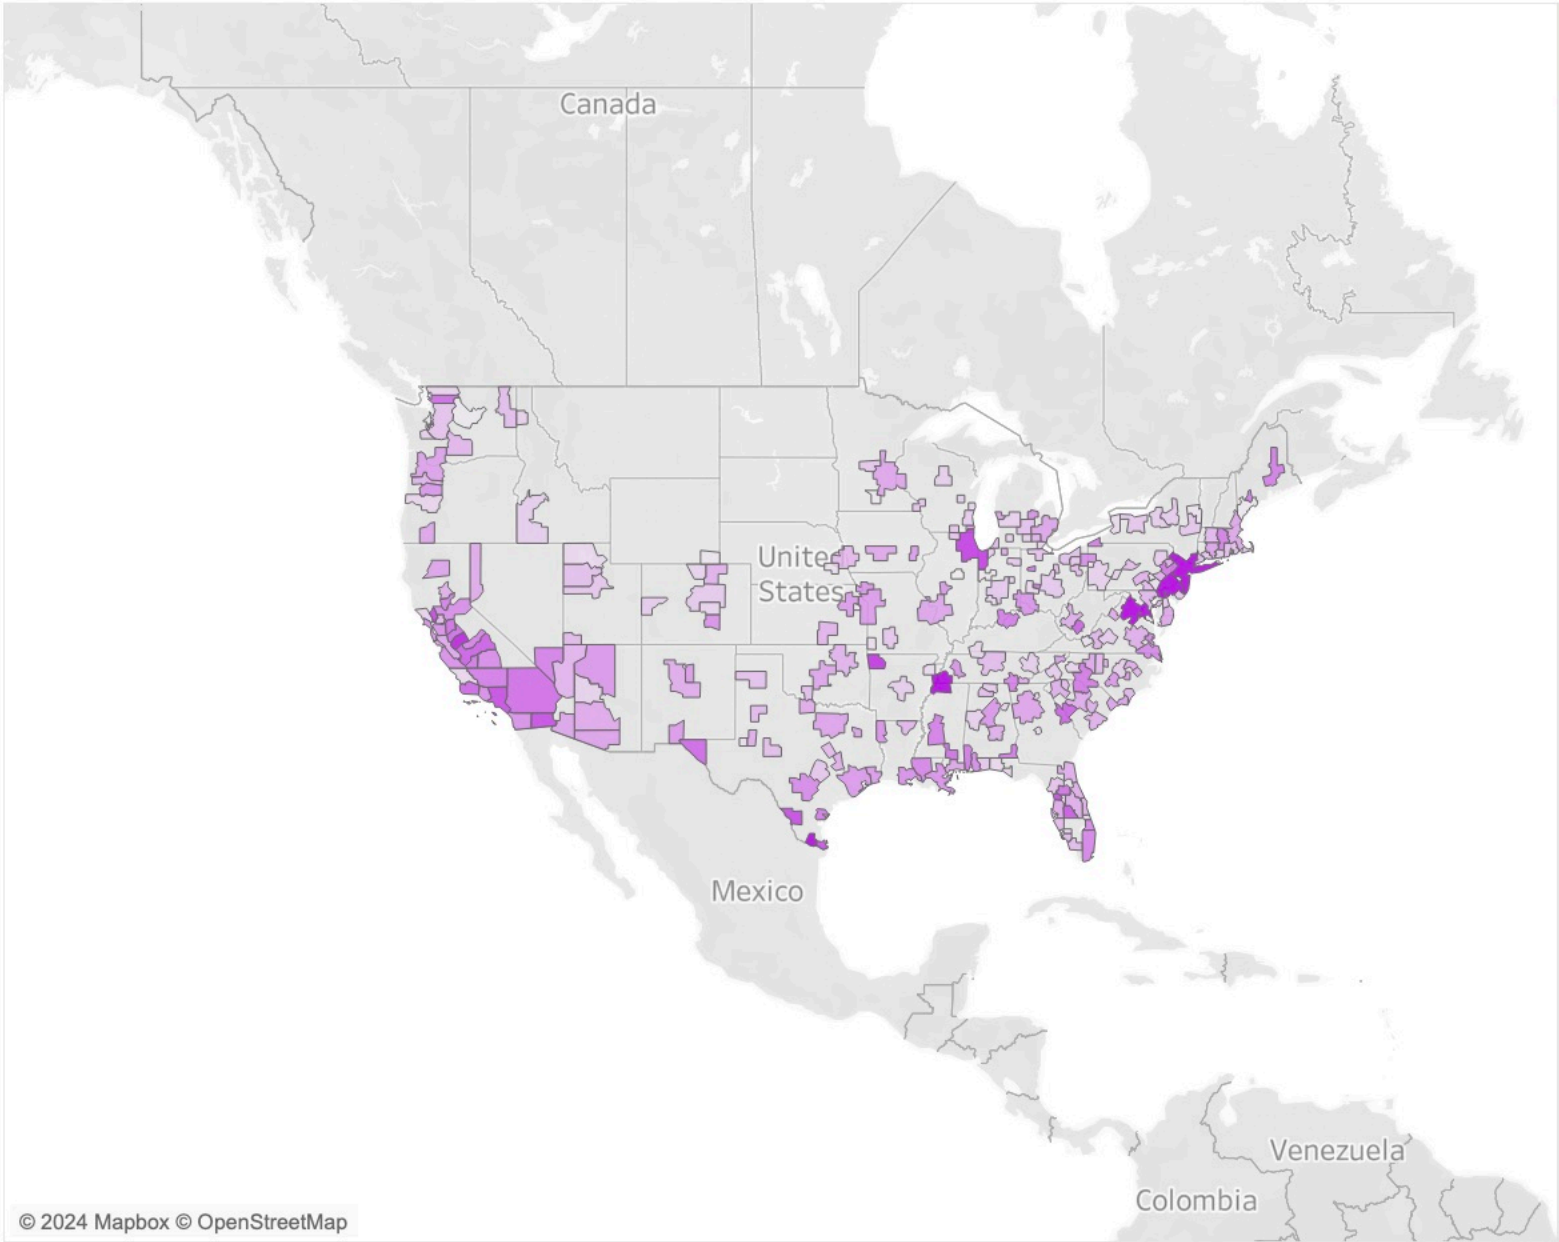

(Among the Total Population)

“Doubling up” (or sharing the housing of others due to economic hardship) is a measure of housing insecurity and hidden homelessness. These dashboards reveal estimates of doubled-up homelessness across the United States using a measure developed by researchers and advocates using person-level American Community Survey (ACS) data (Richard, Dworkin, Rule, Farooqui, Glendening, & Carlson, 2022). Click on your metropolitan area to view estimated counts and prevalence rates for the most recent year of data: 2022.
